Hands that look clean can still have icky germs!

Stay home when you are sick, except to get medical care.

Wash your hands often with soap and water for at least 20 seconds.

Cover your cough or sneeze with a tissue, then throw the tissue in the trash.

Clean and disinfect frequently touched objects and surfaces.

Avoid touching your eyes, nose, and mouth.

Avoid close contact with people who are sick.

When in public, wear a cloth face covering over your nose and mouth.

Help prevent the spread of respiratory diseases like COVID-19.

If you have COVID-19, you may have mild (or no symptoms) to severe illness.

Medical provider for any other symptoms that are severe or concerning.

Seek medical attention immediately if you or someone you love has emergency warning signs, including:

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion or not able to be woken
- Blue lips or face

*Symptoms may appear 2-14 days after exposure.

Fever
Cough
Shortness of breath

Symptoms can appear 2-14 days after you are exposed to the virus that causes COVID-19.

Everyone should

- Wash your hands often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol.
- Avoid touching your eyes, nose, and mouth with unwashed hands.

Avoid close contact

- Avoid close contact with people who are sick.
- Stay at home as much as possible.
- Put distance between yourself and other people.

- Remember that some people without symptoms may be able to spread virus.
- This is especially important for people who are at higher risk of getting very sick.
